## Skills

- Web Development: HTML, CSS, JavaScript
- UI: Mui, Tailwind
- Frameworks: React, React-Native, NodeJS, NestJS, Express
- Database: SQL, MongoDB
- Language: JavaScript
- Other: Cli, Git Bash, Docker

## About Me

I am interested and passionate about coding, and I always enjoy learning new things. I am dedicated and committed to what I do, and I strive to make it as perfect as possible.

## Education

### Bachelor of Science, Applied computer science-multimedia

2012 - 2017

*King Mongkut's University of Technology Thonburi*

- Volunteer Camp's member

## Work Experience

### Similan Technology (Programmer)

06-2023 - Now

#### Android application

Developing an Android app for the POD system based on requirements with React Native, collaborating with the web development team:

- Frontend: React Native
- Backend: NestJS to add certain API endpoints for POD (main backend work handled by web development team)
- Database: SQL (MS SQL Server, stored procedures)

#### RESTful API

Developing a RESTful API for data interface connection with ASP.NET, writing JSON format requests and responses:

- Backend: C# ASP.NET Web API
- Database: SQL (MS SQL Server, stored procedures)

#### Web application

Developing and enhancing a web application (product auction, shopping cart) based on requirements with React, NestJS, and collaborating with a team:

- Frontend: React for shopping cart, auction pages, etc.
- Backend: NestJS to add required API endpoints.
- Database: SQL (MS SQL Server, stored procedures)
